Profile

As an accomplished iOS engineer with around 5 years of experience, my objective is to secure a challenging role that allows me to harness my technical prowess in Swift and Objective-C, along with my comprehensive understanding of iOS frameworks, to drive the development of cutting-edge and user-centric mobile applications. By collaborating with a talented team, I aspire to continuously enhance my skills, contribute to impactful projects, and create exceptional user experiences that push the boundaries of iOS development.

Education

K.S School Of Business Management, 2014-2019
Gujarat University - Ahmedabad, India.
Master Of Science In Computer Application & Information Technology (MSc. (CA & IT))

Work Experience

- Software Engineer at Brainvire Infotech Inc. 08/2022 – Present
At Brainvire, my primary emphasis is on effectively managing threading and minimizing memory leaks, all while maintaining a well-structured and efficient codebase. Additionally I am trying to learn new framework like combine and the hybrid tech React native.
- iOS Developer at Dev IT Limited 08/2021 – 08/2022
Focused on developing scalable and well-documented code with Analysis/Design. Also exploring different frameworks of iOS and expanding skills in MacOS as well plus source control tool - SVN.
- iOS Developer at Excellent WebWorld 07/2019 - 08/2021
Developed an iPad and iPhone app with team in Swift & Objective-C. Ensure building a clean, captivating and user-friendly UI. Eager to get nerdy about memory management, UI layout and rendering, or network performance. Focused on client communication.
- Intern (iOS) at Web-Bunny Solution 01/2019 - 06/2019
Worked on iPhone application using many framework and extensions. Fixed Bugs at several stages of the application development. Involved in deployment.
